

REMARKS

The claims have been amended to delete reference to para-substituted compounds, i.e. amido, cyano and halogen-substituted compounds.

Applicants submit the claims, as amended, are directed to composition exhibiting unexpected solubility properties. This has been demonstrated in the previously submitted Declaration of Christopher J. Burns, submitted with the Request for Reconsideration filed December 18, 2008, incorporated herein by reference. These improved solubility properties also are demonstrated in the working examples in Applicants' sworn specification.

With the foregoing Amendment it is believed the application now is in order for allowance, and no specific discussion of the art rejection is believed necessary.

Having dealt with all the objections raised by the Examiner, the application is believed to be in order for allowance. Early and favorable action is respectfully requested.

In the event there are any fee deficiencies or additional fees are payable, please charge them (or credit any overpayment) to our Deposit Account Number 08-1391.

Respectfully submitted,

Norman P. Soloway  
Attorney for Applicant  
Reg. No. 24,315

CERTIFICATE OF ELECTRONIC FILING

I hereby certify that this correspondence is being deposited with the United States Patent Office via the electronic filing procedure on January 3, 2011.
